

HUMIDIPAK

TWO WAY HUMIDIFICATION SYSTEM

Keeping your instrument safe and playable has never been easier, thanks to D'Addario Humidipak. Using Boveda's patented two-way humidity control technology, Humidipak automatically adds or depletes moisture to maintain the ideal humidity level of 45-50% RH inside your instrument case, and eliminates the guesswork and anxiety of maintaining your instrument.

Best of all, using Humidipak is easy. No more dripping sponges or manual adjustments. Simply place the humidification packets with the included pouches into your instrument case, close the lid and relax, knowing your instrument is safe and sound.

Humidipak Maintain is a humidification device and not intended for use in constant high humidity environments.
