

SMALL INSTRUMENT HUMIDIFIER

Maintaining your instrument's humidity level is essential to preserve its playability, sound, and integrity. The D'Addario Small Instrument Humidifier protects your instrument even in the driest conditions against cracks, warping, and shrinkage. The humidifier releases moisture slowly and evenly inside your instrument's case to maintain the proper humidity level. Maintaining the humidifier is as easy as moistening the sponge when it becomes dry. The frequency of maintenance can vary considerably depending on your specific atmospheric conditions.

INSTRUCTIONS:

1. Remove cap and moisten sponge
2. Replace sponge and cap
3. Place in instrument case & secure lid
