

# STRING SELECTION

Prelude strings are the warmest solid steel core strings available and are durable, easy to bow, and very stable in pitch.

Designed to help players advance their craft, Ascenté strings have a wide tonal range, excellent pitch stability, and superior durability.

Constructed with a nylon core, Pro-Arté strings are stable, resistant to humidity, and feature a rich, warm sound and good bow response.

Helicore multi-stranded steel core strings produce a warm and clear sound with excellent break-in time, comfortable playability, and quick bow response.

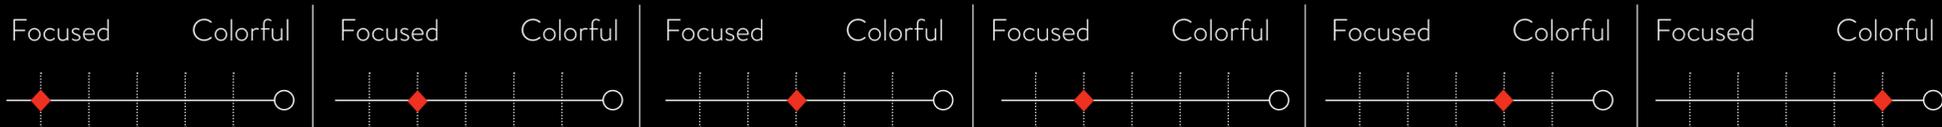

Zyex multi-fiber core strings provide excellent pitch stability, gut-like richness, balanced tone, and comfortable bow response.

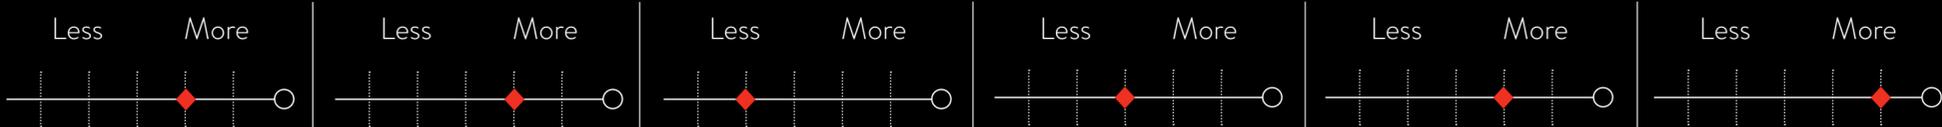

Kaplan strings offer professional-level players an unprecedented balance of beauty and power, combined with excellent bow response and brilliant clarity.
